Summary

Motivated software engineering intern with solid hands-on experience in React.js and Node.js, freshly graduated with a **BSc (Hons) Software Engineering - Second Class, Birmingham City University**. I have built end-to-end web applications from interactive front-ends to Restful back-end services and thrive in collaborative, team driven environments. I am looking to commit fully to a meaningful internship where I can contribute to real-world engineering challenges, grow alongside a talented team, and build a long-term career within a forward-thinking organization

Skills

Core Technologies

- React.js
- Node.js
- Express.js
- JavaScript (ES6+)
- REST APIs
- MongoDB
- MySQL
- Java
- Spring Boot
- Git & GitHub

Frontend extras

- React Hooks
- React Router
- Axios
- Tailwind CSS
- Responsive Design

Backend & tooling

- JWT Authentication
- npm / yarn
- Postman
- JSON
- MVC Architecture
- Environment Variables (.env)

Professional Experience

10/2025 – 04/2026
Online

Developerstack

Intern

Contributed to the development of SaaS products as part of a collaborative team, building frontend interfaces with Angular and Next.js and integrating Spring Boot backend services, with all code managed through GitHub-based workflows.

Education

01/2025 – 04/2026

BSc (Hons) Software Engineering

Birmingham City University (UK)

01/2022 – 12/2024

Gampaha

Software Engineering - UK Awards Validated (Levels 1 - 3)

Java Institute For Advance Technology

- UK Awards Level 1 - Foundation Diploma in Software Engineering
- UK Awards Level 2 - Diploma in Software Engineering
- UK Awards Level 3 - Higher / Graduate Diploma in Software Engineering

Certificates

Foundations of User Experience (UX) Design

Understand foundational concepts in UX design, such as user-centered design, the design process, accessibility, and equity-focused design.

Projects

05/2025 – 06/2025	BidSync Frontend (React) Online Auction System BidSync Frontend is a React + TypeScript application for an online auction platform with authentication, auction browsing, bidding, admin management, and real-time bid updates.
10/2024 – 11/2024	chitchat (React-native) Mobile App A Java Servlet + Hibernate based chat backend project with MySQL persistence, user profile handling, and basic one-to-one messaging APIs.
07/2022 – 08/2022	Eshop (Full-stack) Ecommercial platform Built a fully functional online buying and selling platform with an admin panel, handling product listings, user accounts, and order management. Implemented with a MySQL database and a responsive frontend.
02/2023 – 04/2023	letsplay Web (HTML/CSS/PHP) Ecommercial Game Buying and Selling platform Web Application using html , css , php , javascript . fully functional website with MySQL Database
05/2025 – 06/2025	BidSync backend (JAVA) Online Auction System Online Auction System Using Backend Java (EJB , EAR , JMS) ,
07/2025 – 08/2025	BankAuto (JAVA) JSP Banking System Developed a comprehensive web-based banking management system using Java EE technologies, featuring separate interfaces for administrators and end-users with role-based access control. (Gson,BCrypt,EJB)
01/2025 – 02/2025	letsplay (Android/JAVA) Online game streaming platform Developed an Android application in Java enabling users to register as gamers or streamers, featuring account creation, a live scoreboard, and a personalised homepage.
07/2025 – 08/2025	GlobeMed (JAVA) GlobeMed Hospital Management System GlobeMed is a Java Swing-based Hospital Management System (HMS) that combines core clinical workflows with multiple design pattern implementations for educational and practical use.
